SAUGERMED

Surgical Brain Pads

Various options for different use of purpose 2 main featured and structured pad produced from 11 various raw material.

Viscose Pads

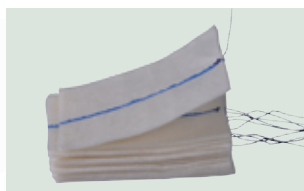

SAUGERMED Thinpad

- Absorption capacity 7.1 times of its weight.
- Very thin, smooth and silky structured.
- Made of viscose and synthetic additive material.

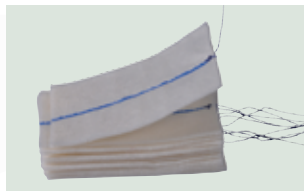

SAUGERMED Plus

- Absorption capacity 6 times of its weight .
- Thin, closely structured.
- Made of viscose and synthetic additive material.

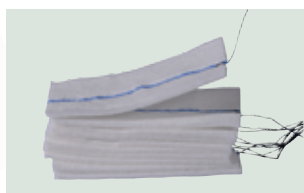

SAUGERMED Thincot

- Absorption capacity 8.5 times of its weight.
- Thin, smooth structured, laminated surface.
- Made of viscose and synthetic additive material.

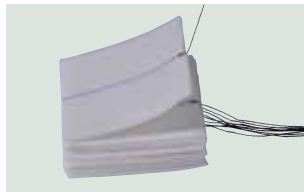

SAUGERMED Laminat

- Absorption capacity 8.3 times of its weight.
- Standard thickness, smooth structured, laminated surface.
- Made of viscose and synthetic additive material.

SAUGERMED Soft

- Absorption capacity 7.3 times of its weight
- Standard thickness, closely structured, laminated surface.
- Made of viscose and synthetic additive material.

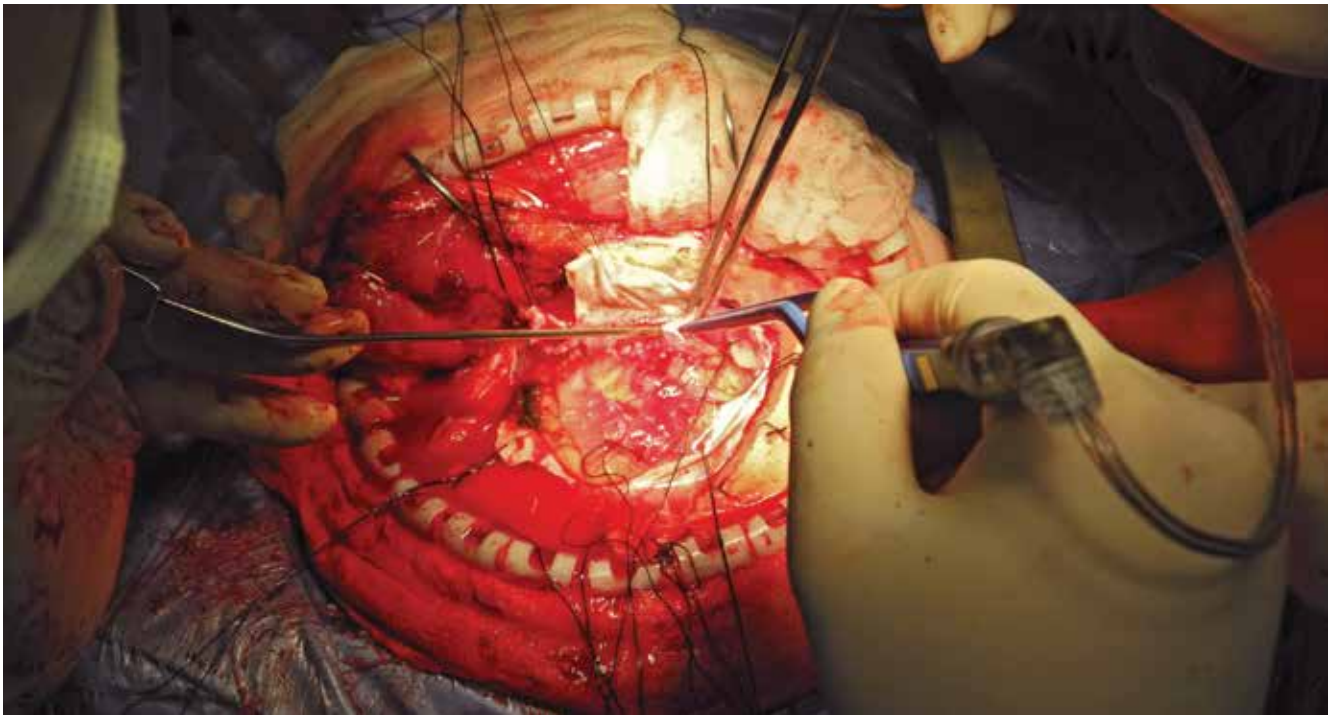

SAUGERMED Ultra Soft

- Absorption capacity 8.5 times of its weight.
- Smooth , delicate structured.
- Made of viscose and synthetic additive material.

SAUGERMED Cotton Soft

- Absorption capacity 10 times of its weight.
- Very smooth, delicate structured.
- Made of viscose and synthetic additive material.

Cotton Pads

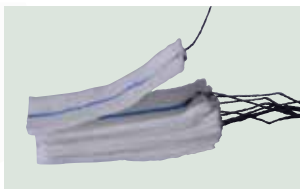

SAUGERMED Pure Cotton

- Absorption capacity 6.3 times of its weight.
- Very thin, very light structured.
- Made of 100% cotton raw materials

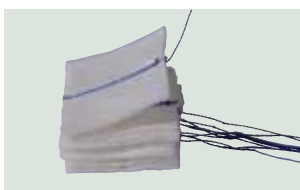

SAUGERMED Pure Cotton Thick

- Absorption capacity 8.3 times of its weight
- Smooth, delicate structured.
- Made of 100% cotton raw materials

SAUGERMED Pure Cotton Medium

- Absorption capacity 7.6 times of its weight
- Smooth, delicate structured.
- Made of 100% cotton raw materials

SAUGERMED Pure Cotton Soft

- Absorption capacity 11.5 times of its weight
- Very soft, very absorptive, closely structured.
- Made of 100% cotton raw materials.
